

available for the middle/high school students. Parents are encouraged to bring healthy and fun food snacks for parties. Gilpin's secondary school has only one vending machine and it only has water. Jane explained students are choosing to just drink water not gatorade or sparkling flavored water. The banners in the lunchroom promote healthy choices and protein information. All ala carte snacks meet the guidelines for "Smart Snacks". A few students got up and spoke about what they like about the food program and gave recommendations.

- Aaron Moran, PE Health Coach spoke about providing daily opportunities for students to engage in physical activities. Gilpin meets the required periods of physical activity and is consistent with requirements of state law. A way to get students more active is with non-competitive activities, teaching them about fitness, and why you need to be healthy. All teachers are encouraged to give "Fitness Breaks" in elementary and middle/high school. Sports programs are working well. Weight training class run by Craig Ball in the morning at 6:30. Aaron is one of many who is excited about Gilpin County's new track and field and says it will help in many ways like taking the kids outside to run around more.

Administrative Reports:

- Alexis discussed shared learning targets and feedback on student engagement by asking students questions in groups of three and giving peers the feedback. All the teachers are mixed-up in different classes, looking for different perspective, engaging with the students, and asking questions. Teachers are able to watch students in a different class and see how the student behaves in a different setting.
- Heather reported elementary is making sure to have learning targets and looking for student engagement and rigor. The next SOAR celebration will enjoy a magic show.

Board Reports:

- Dave is working on completing 5 applications for grant money to supplement the track and field. Timeline is to have the track completed by August 1, 2018.

Adjourn: 6:59 pm

Next Meeting: March 13, 2018
